

*Professor of the Pristina university of Austria Siegfried Peter Ladnorg*

As a result of efforts on work of the international cooperation Professor of the Pristina university of Austria Siegfried Peter Ladnorg was invited. Professor gave a course of lectures on discipline "Commercialization of new technologies" for undergraduates of specialty 6M073200 – "Standardization and certification". He also opened "Winter school" for students and undergraduates of the Standardization department and certification on a subject of "Quality management system". It should be noted that professor gave big attention to practical skills, referring to world giants as "Mercedes-Benz", "Ford", "Boeing". Besides, professor Ladnorg took part in a round table where he shared the opinions and his experiences about perspectives, about education in Kazakhstan and abroad. Plus to everything, professor gave his expert opinion for licensing of specialties "Standardization and Certification" 6M073200, 5V073200 and "Metrology" 6M075000, 5V075000 of a bachelor degree and a magistracy.

Siegfried Peter Ladnorg held a scientific seminar, took part in work of a round table. Lectures of professor Siegfried Peter Ladnorga differ in practical orientation. Within five years he trained in Kazakhstan (the plants of mechanical engineering, Ust-Kamenogorsk and Kostanay) in the quality standards of automotive industry for the enterprises of agriculture and automotive industry.

Within Siegfried Peter Ladnorga's visit it is supposed to hold the next scientific seminars for the faculty of department and undergraduates: "Industrial development of the country", "The European standards on quality", "Quality management of EN ISO 9001:2000".
